DETAILED ACTION

Election/Restrictions

1. The Applicant's election without traverse of Group II: claims 31-35, and Species IV: claims 1-3, 5-8, 11-14, 18 and 19 in the reply filed on March 14, 2007 is acknowledged. However, the Applicant's election of claims 18 and 19 is improper since these claims were not part of Species IV as set forth in the original requirement for election/restriction mailed February 2, 2007. In addition, claims 18 and 19 are dependent claims and would be of improper dependent form if elected when considering that the claim from which they depend stands withdrawn from consideration. Therefore claims 18 and 19 are additionally withdrawn from consideration and will not be examined.
2. Claims 1-3, 5-8, 11-14 and 31-35 are pending and have been examined.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 2137

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-3, 5-8, 11-14 and 31-35 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-29 of co-pending U.S. Patent Application Pub. No. 2007/0223704 A1. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-29 of the co-pending U.S. Patent Application contain every element of claims 1-3, 5-8, 11-14, and 31-35 of the instant application and as such anticipate the claims of the instant application. This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

"A later patent claim is not patentably distinct from an earlier patent claim if the later claim is obvious over, or anticipated by, the earlier claim. In re Longi, 759 F.2d at 896, 225 USPQ at 651 (affirming a holding of obviousness-type double patenting because the claims at issue were obvious over claims in four prior art patents); In re Berg, 140 F.3d at 1437, 46 USPQ2d at 1233 (Fed. Cir. 1998) (affirming a holding of obviousness-type double patenting where a patent application claim to a genus is anticipated by a patent claim to a species within that genus). " **ELI LILLY AND COMPANY v BARR LABORATORIES, INC.**, United States Court of Appeals for the Federal Circuit, ON PETITION FOR REHEARING EN BANC (DECIDED: May 30, 2001).

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 11, and 31 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Best, US 4,278,837 (submitted with the Applicant's IDS).

As for claim 1, Best teaches a method comprising: programming a chip secret key into a manufactured chip; sending the manufactured chip to a system original equipment manufacturer (OEM) (fig. 1 element 5, fig. 2 element 5, 89, fig. 3 element 167, col. 4 lines 40-67, col. 7 lines 5-25); and generating at least one private key for the manufactured chip according to a received key update request (col. 14 lines 15-67).

As for claim 11, an article of manufacture including a machine readable medium having stored thereon instructions which may be used to program a system to perform a method, comprising: programming a chip secret key into a manufactured chip; sending the manufactured chip to a system original equipment manufacturer (OEM); and generating at least one private key for the manufactured chip according to a received key update request. (fig. 1 element 5, fig. 2 element 5, 89, fig. 3 element 167, col. 4 lines 40-67, col. 7 lines 5-25, col. 14 lines 15-67)

As for claim 31, an integrated chip, comprising: key request logic to generate a key update request using a preprogrammed chip secret key stored within the integrated chip to receive at least one private key from a key distribution facility (KDF) (fig. 1 element 5, fig. 2 element 5, 89, fig. 3 element 167, col. 4 lines 40-67, col. 7 lines 5-25).

Allowable Subject Matter

7. Claims 2, 3, 5-8, 12-14, and 32-35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
